# DILLAS BLOGGERICAN GARDENS

#### TO ALL OUR CUSTOMERS AND FRIENDS

We again have pleasure in presenting to you our catalogue, listing all kinds of spring flowering bulbs. We added some varieties to our list, and we trust that you will find many interesting varieties in there. If anything you wish to have is not listed, please let us know, and we will supply it at the best market price.

Our sincere thanks to all customers who have favored us with their orders for the past season.

If you are planning to add more bulbs to your garden, we hope you will favor us with your esteemed orders, at an early date, so that prompt delivery can be made. We will be delighted in helping you to beautify your home and garden by supplying you with bulbs of the choicest and finest quality, which are bound to produce an abundance of flowers and bring joy and beauty in your garden and home next spring.

Every bulb will be carefully selected for you and is backed up by our guarantee to be topsize, sound and true to name and description.

Permit us to ask you to share this catalogue with your friends, or we shall be very pleased to send them a copy if you will let us have their names and addresses.

Sincerely yours,

THE HOLLAND BULB GARDENS, Inc.

Limmen, Holland, June 1948.

#### TERMS AND INSTRUCTIONS

PRICES are quoted prepaid to destination in U.S.A.

PAYMENTS: All orders under \$10.00 are cash with order. Orders for \$10.00 or more, if desired, can be accepted at 25% with order and balance C. O. D.

GUARANTEE: WE DO GUARANTEE ALL FLOWER BULBS to be true to name and of extra high quality only.

TIME OF SHIPPING: All bulbs will be shipped from Holland the middle of August onwards, so, if you want your bulbs early, kindly send in your orders as soon as possible.

SUBSTITUTION: Only in the event of a variety being sold out. We shall take the liberty to send you the next best substitute and inform you about this, too. Unless instructed by you to the contrary.

FORCING: Varieties marked (\*) are suitable for indoor forcing. Do not

force too quickly Give them time.

GROUP ORDERS: From a group, we have many customers in offices, schools, factories and garden communities who combine their orders in one. The individual orders are packed and labeled separately at no additional charge. COMPLAINTS: Shortages, damages or defects should be reported immediately upon unpacking the goods.

APPLY FOR SPECIAL PRICES ON LARGE QUANTITIES

#### SINGLE EARLY TULIPS

Single Early Tulips are all dwarf growing, 12 to 14 inches, and are very suitable for formal beds, many varieties also for indoor forcing during the winter.

#### FLOWERS BRING JOY

CLOWERS bring joy. And in what way can the investment of so small a sum bring more lasting pleasure than in their purchase? Flower lovers well agree that of all blooms none give more pleasure for the slight trouble and expense involved in growing them than Spring flower bulbs — Tulips, Hyacinths, Daffodils, Crocuses and the like — for which Holland has so long been famous.

	WEBER, a very dainty white with slight rosy touch	.90	6.75
96.	WHITE SAIL, early white	.90	6.50

#### A WINTER LONG DELIGHT INDOORS

from March until June — but add their good cheer to dispel the dreariness of long Winter days. A few pots blooming on the window sill or in the Winter window garden, will change the whole atmosphere of the room and for this purpose they may be had in long succession, from Christmas to Easter. Here again their cultivation is of the simplest. All that is necessary is to place the bulbs in pots. The bulbs are placed with the tops just level with the soil surface, about half an inch below the rim of the pot. Allow them to make roots in some cool, dark place, water pots in cellar weekly, and then bring them into living room or sun porch to bloom, but not before the bud is three inches long. Bulb pans (shallow flower pots) with half an inch of broken pots, pebbles or crushed shell on the bottom for drainage, are used for planting. Hyacinths and many Daffodils may be grown directly in pebbles and water, in moist peat moss or bulb fibre (obtained from Seedsmen). Peat moss and bulb fibre should be thoroughly moistened before use. Allow them to make roots in a cool, dark place, under no circumstances place them into the living room before the bud is three inches long. The longer the pots remain in a cool place the better and when placed into the room or greenhouse, a moderate temperature is to be preferred. Avoid dry room temperature.

#### PARROT TULIPS

With Strong Stems and Perfect Flowers of Great Substance

A fine collection of the newest Parrot Tulips, which you will find of great interest.

HYACINTHS ON GLASSES
You will more than enjoy them.

## IMPORTED HYACINTH GLASSES

Very Beautiful Designed — Sold With Bulb Order Only
75c each — 6 Glasses for \$4.00
A Fine and Lasting Gift of Beauty

#### GROWING HYACINTHS ON GLASSES!

Growing Hyacinths on glasses should be more widely propagated, as few plants, if any, can give so much pleasure and satisfaction in the home during the dark winter months than Hyacinths on glasses.

It is a real joy, having its new attraction every time again, to watch the gay colored Hyacinths develop in the home and when once succeeded in growing fine flowers, one will wish to have Hyacinths in his home every winter.

To obtain good results is not difficult at all, a child can do it, if the following hints are observed:

- 1. Take good sound bulbs, preferably 1st or 2nd size.
- 2. The best time to put Hyacinths on glasses is from the end of September on.
- 3. Clean glasses thoroughly and fill with pure water, a little piece of charcoal may be added to keep the water pure.
- 4. Place bulbs on the glasses, taking care that the bottom of the bulbs nearly but not quite touches the water.
- 5. Then place glasses in a cool, dark but airy space in a temperature of about 50-55 F. degrees where the rootgrowth soon commences. Watch the glasses regularly and keep water on the necessary level, replacing it by fresh water if it should become foul.
- 6. One of the most important points for success is that the bulbs are not brought to the light too soon, therefore do not place bulbs into the light before the flowerbud has just grown completely out of the bulb. This can easily be ascertained by carefully handling the nose through your thumb and finger. If the flowerbud, which is inside the nose, is out, you will feel a little hollow between the bud and the bulb.
- 7. Then bring the glasses gradually not at once to the full light of the window, 60-70 F. degrees being the best suitable temperature to further develop the flowers. Take care that the evaporated water is regularly replenished so as nearly to touch the bottom of the bulb again. Use for this purpose water having the same temperature as the room. Avoid dry room temperature.

TRUMPET DAFFODILS

These are the best known of the Narcissi or Daffodils. They are distinguished in having the cup at least as long as the saucer is wide. They are represented by all yellow, all white and two-color types.

#### NARCISSUS AND DAFFODILS

All our Narcissus are supplied in top-size double nose bulbs.

Top-size bulbs produce from 2 to 5 flowers.

Who will describe the beauty of Narcissi and Daffodils for early Spring bloom in gardens, for naturalizing in woodland borders and for forcing for Winter bloom. They hold a unique place amongst the Dutch bulbs. Shiploads of the bulbs are used annually by American growers for the florists' trade. There are several distinct classes of Narcissi, the characteristics of which are explained in the heading of each group.

POETICUS NARCISSUS

#### INCOMPARABILIS NARCISSUS

The cup (chalice or crown) of the Incomparabilis Narcissus is larger
than that of the Barrii Narcissus. It measures from one-third to nearly equal
the length of the perianth segments. Like the Barrii they are much favored
for cut flowers, for borders and for forcing.

		Dozen	Per 100

Write us for special prices on large quantities.

(All sizes available.)

#### TUBEROUS ROOTED BEGONIAS, Imported

Begonias do well in partly shaded spots, in light soil, well enriched with leafmould, with certain amount of moisture. After flowering — until frost — lift bulbs, and store in dry and cool frost-free place until next Spring.

#### LARGE TUBERS ONLY

	Per Dozen	Per 50
559. GIANT DOUBLE CAMELLIA FLOWERING 560. SINGLE PLAIN 561. SINGLE CRISPA, frilled edges 562. DOUBLE CARNATION type 563. MULTIFLORA 564. PENDULA, or hanging basket type	2.50 2.50 2.50 2.75	\$ 8.00 8.00 8.00 8.00 8.50 8.50

Colors are: Scarlet, orange, salmon, rose, white, yellow, peach and deep red.

#### **GLOXINIAS**

Grow indoors warm and moist, shield from direct sunlight. Do not water overhead. On completion of blooming, watering should be discontinued and bulbs allowed to rest, to be started again next season.

565.	GLOXINIAS,	mixed	olors		bulbs for \$1.00
	In separate	colors		per	50 bulbs \$9.00

Order early. It takes time and care to put up orders.

# HOW TO PLANT HOLLAND BULB GARDENS' BULBS

#### PLANTING OUT OF DOORS

THE cultivation of these bulbs is simplicity itself. Provided only that one starts with sound, firm bulbs — obtained from a thoroughly reliable source — failure is almost impossible. When planting out of doors the soil is prepared as for other flowers, by being well dug and fertilized. Even in unfertilized soil the bulbs will usually give good flowers and for the best results it pays to be generous in the matter of fertilizing, using bonemeal. Each year some additional plant food can be given right after planting and again just after flowering. The purpose of the latter application is to develop good strong bulbs for next season's bloom. Good drainage is essential — particularly for Tulips. The depth to plant is about five inches. Planting is best done in September, October — and in some parts very well possible during early November. As all of the so-called Dutch bulbs are perfectly hardy, protectioning against frost is not essential, but many gardeners provide for a Winter covering after the ground freezes hard to prevent premature growth in the Spring and thus lessen the chance of injury from late frost.

We agree there are larger and more colorful catalogues. You will agree that our bulbs are larger and wait till you see the flowers, so colorful, and all at the very best prices and delivered.
